

```
import java.util.*;

class Main {

    public static void main(String[] args) {

        Scanner Sc = new Scanner (System.in);

        String name = Sc.nextLine();

        String firstLetter = name.substring(0, 1);

        String remainingLetters = name.substring(1, name.length()-1);

        String lastletter = name.substring( name.length()-1,name.length());

        firstLetter = firstLetter.toUpperCase();

        lastletter = lastletter.toUpperCase();

        name = firstLetter + remainingLetters+lastletter;

        System.out.println("Name: " + name);

    }

}
```
